SUMMARY

Full-stack developer who has shipped production apps in Next.js, Rust, and React Native. Interned at Hooman Digital building AI-powered tools and deploying services on AWS ECS. I have also freelanced for clients, built a cross-platform desktop app in Tauri, and set up event-driven systems with Kafka. Comfortable across the stack, from frontend to infrastructure. Currently exploring Web3 development on Solana and Ethereum.

EXPERIENCE

Software Engineer Intern, Hooman Digital

Oct 2025 – Nov 2025

- Shipped **3 AI-driven products** using **MCP** and **AI SDK**, integrating intelligent chat and automation workflows
- Contributed to the **Nosana-deployer MCP** project and its chat integration
- Integrated **Stripe** payments into chartor.ai, including checkout flows and webhook handling
- Containerized and deployed **5+ services** on **AWS ECS** with **Secrets Manager** for secure config
- Set up **CI/CD pipelines** using **GitHub Actions**, reducing deployment time by **80%** (30min to 5min)
- Worked across **Next.js**, **Express.js**, and **Electron.js** codebases

Freelance Full-Stack Developer, Hyper Digital

Jan 2025

- Delivered a responsive, SEO-optimized business website achieving **95+ Lighthouse score** and **sub-2s load time**
- Built an internal **admin dashboard** handling **500+ monthly form submissions**
- Configured secure document uploads to **AWS S3** with structured storage and retrieval
- Integrated **Cal.com** scheduling and automated contact workflows with **Nodemailer**

PROJECTS

TypeCast – Tauri 2, Rust, React, Vite, Tailwind CSS, rdev

- Built a cross-platform keystroke visualizer for **Windows, macOS, and Linux** with **sub-10ms** capture latency
- Created a global keystroke listener in **Rust** using **rdev**, emitting real-time events to the UI
- Engineered a transparent, click-through, always-on-top overlay visible across all workspaces
- Added system tray controls to start/stop monitoring and manage application lifecycle
- Privacy-first approach: ephemeral in-memory events, zero disk or network logging

ExpTrack – Expo, React Native, Rust, Axum, SQLx, PostgreSQL

- Developed a full-stack expense tracker with a **React Native (Expo)** app and **Rust (Axum)** backend
- Architected **15+ REST endpoints** using **Axum** with layered middleware, achieving **sub-100ms** response times
- Integrated **PostgreSQL** with **SQLx** for type-safe queries and schema-driven data access
- Added secure local storage for auth tokens and optimized data fetching with **TanStack Query**
- Authored validated forms using **React Hook Form** with **Zod** and reusable native UI components

FlowForge – Kafka, Turborepo, Next.js, TypeScript, Express, Prisma, Docker

- Launched an open-source automation platform supporting **10+ workflow connectors**
- Configured event-driven processing using **Kafka** for reliable message handling
- Structured a modular monorepo architecture using **Turborepo** with **5 independent services**

TECHNICAL SKILLS

Languages: Rust, TypeScript, Python, Golang, C/C++, SQL, Bash

Frontend: React, Next.js, Astro, React Native (Expo), Tailwind CSS, Zustand, TanStack Query

Backend: Node.js, Express, Hono.js, Axum, Go Fiber, GraphQL, Socket.io, Prisma

Web3: Solana, Ethereum, Anchor, Solidity, Web3.js, Ethers.js, Wagmi, Wallet Adapters

Databases: PostgreSQL, MongoDB, Redis, MySQL

DevOps: AWS (S3, EC2, ECS, ECR, Secrets Manager), Docker, Kubernetes, Terraform, GitHub Actions, Kafka, Prometheus, Grafana

Tools: Git, Linux, Turborepo, Vitest, Postman

EDUCATION

Central University of Rajasthan

Bachelor of Technology in Computer Science and Engineering

- **CGPA:** 8.65/10 (5th Semester)

Ajmer, Rajasthan

Aug 2023 – May 2027
